About

I leverage 5 years of SEO experience to drive organic traffic and positioning. I do also specialize in simplifying complex concepts, such as rendering, site structure, and internal linking into easily understandable insights and actionable strategies.

I focus on preparing technical SEO foundations for AI Search (AEO/GEO). My approach is investigative, ensuring data is structured and accessible for the new generation of search.

Professional Toolkit

	Analysis,SEO & CMS	AEO & GEO	Programming	Data Visualisation
Tools	Google Search Console, Google Analytics, Screaming Frog, Ahrefs, Nightwatch, Accuranker, SurferSEO, WordPress	Query fan-out tools, Developer Tools, Claude, ChatGPT, Gemini, Perplexity, xfunnel.ai	HTML, CSS, JavaScript, Python (mostly read only knowledge)	Microsoft 365 package, Google Looker Studio

Experience

SEO Manager at SkyCity Entertainment Group (Dec 2024 – Present Day)

- **Stakeholder liaison:** Acted as a bridge between external technical development teams and senior management during a platform migration. I was responsible for "translating" technical risks of and requirements for SEO into day-to-day language.
- **Technical foundation:** Delivery of core technical SEO requirements for the new platform, creation of a new sitemap and providing recommendations on rendering strategies for optimal performance.
- **Reporting & insights:** Weekly and monthly data reporting on SEO performance, current trends and impactful changes to senior management. Technical audits as a part of on-going site performance & error spotting.
- **Keyword research & content planning:** Ensuring strong on-page fundamentals for key landing pages.
- **A/B testing:** Execution of A/B tests across the domain, including changes in meta titles, content updates, schema markups, tables, and short content summary sections.
- **PR & link building:** Management of PR strategy in collaboration with external partners. PR efforts aligned with a new link building strategy focused on natural placements,

strengthening online presence for key non-branded queries. Recorded a 184% growth in non-branded traffic within the first 10 months of employment.

Freelancing: OutWithKidz.com (Feb 2025 – Present Day)

A hobby project targeting families with children in Malta.

- **End-to-End SEO Foundation:** Built the technical and on-page structure from scratch, including redirect logic, crawl efficiency, and schema implementation.
- **Search Intent Mapping:** Researching how AI engines expand user intent (query fan-out) to ensure content covers conversational patterns and follow-up queries.
- **Optimization Experiments:** Testing on-page elements and structured data to monitor how traditional and emerging search engines interpret brand authority.

SEO Manager (Apr 2023 – Nov 2024) & SEO Specialist (Feb 2022 – Mar 2023) at GiG

- **Client communication:** Advised clients on SEO strategies, both on-page and off-page. Focused on clear communication and easy-to-understand language when explaining SEO-heavy concepts to clients.
- **SEO audits:** Responsible for conducting SEO audits of potential clients as well as continual audits for onboarded clients.
- **Content planning:** Ran a brand-new blog section at one of our clients' website. I was responsible for content strategy including content brief creation and keyword research, contact with freelancers, content evaluation and fine tuning of the content pieces.
